-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to provide adequate description of the step of or means for packing the measured heart beat interval information such that the duration of the sound collage is shorter than the time spent for measuring the heart beat intervals, as recited by claims 1 and 10 of the application. Paragraphs 0014 and 0039 of the specification state that the packing can be performed by averaging the heart beat interval information, and that the packed data is shorter in duration than the actual measuring time. However, the description still fails to explain how such averaging results in a shorter duration of the packed data or how the duration of the packed data is reduced at all.

Conclusion

At this point, no prior art has been applied. However, it is noted that it is unclear what constitutes the step of packing in claim 1 and the means for packing in claim 10 as described above. Consideration of prior art will be revisited upon resolution of the enablement rejection of claims 1-21 under 35 U.S.C. 112, 1st paragraph.
